AIR SYSTEMS

INTRODUCTION

Find thoughtful gifts for every person on your list with Austin Air's Holiday Gift Guide.

FOR PET LOVERS

Pet parents already have it all—almost! Discover gifts that bring an extra layer of comfort and care for both pets and their humans.

FOR HOME CHEFS

Shopping for chefs can be a challenge since they often own all the basics. Consider gifts that add safety and health benefits to their culinary spaces.

FOR THE HEALTH-CONSCIOUS

Show you care with gifts that support wellness and a healthier home environment for the health-minded loved ones on your list.

FOR NEW PARENTS

Welcoming a baby means juggling countless essentials. These gift ideas can help parents feel ready for every new adventure with their little one.

FOR ALLERGY SUFFERERS

Millions cope with allergies daily. Give the gift of comfort with options that help alleviate symptoms and enhance indoor air quality.

INTRODUCTION

FOR URBAN DWELLERS

City life has its perks—but clean air isn't always one of them. Discover gifts that help reduce exposure to pollutants and create a safer indoor space.

FOR RURAL RESIDENTS

Living off the beaten path often means unique air quality concerns. These gifts help rural dwellers stay healthy and comfortable all year round.

FOR TEACHERS

Teachers give so much, especially in post-pandemic classrooms. Help them keep their students and themselves safer with a thoughtful gift.

FOR WORK-FROM-HOME EMPLOYEES

For those spending long hours in their home office, a fresh workspace can make all the difference. Gift them the tools for a healthier workday.

FOR THE ECO-CONSCIOUS

Make a difference with gifts that align with eco-friendly values and promote sustainability.

FOR PEOPLE WITH SLEEP ISSUES

A good night's sleep is priceless. Give the gift of restful nights and brighter days to those who need it most.

INTRODUCTION

FOR THE IMMUNOCOMPROMISED

For loved ones with compromised immune systems, a healthy, safe environment is key. These gifts offer cleaner air and peace of mind.

FOR PEOPLE WITH COPD

COPD symptoms can be challenging to manage. Choose a clinically-proven gift to help make breathing easier and more comfortable.

FOR PEOPLE WITH ASTHMA

Asthma can be difficult to control, but these thoughtful gifts can help lessen symptoms and provide daily relief.

FOR OLDER ADULTS

Protect the health of grandparents or other older loved ones with a gift that supports cleaner, safer air in their home.

FOR PEOPLE IN WILDFIRE ZONES

For those in wildfire-prone areas, air quality is a major concern. These gifts help filter harmful particles, keeping indoor air fresh and safe.

THE AUSTIN AIR HOLIDAY GIFT GUIDE

Looking for a truly meaningful gift for someone who seems to have everything? Or for a family member who could benefit from improved air quality but isn't sure where to start? Perhaps you're shopping for a health-conscious or chemically sensitive friend who avoids scented candles and other typical holiday gifts? Or you'd like to make a big gesture and could use some easy pay-over-time financing option?

Austin Air's Holiday Gift Guide has you covered with thoughtful options for everyone on your list! With the season of giving upon us, it's the perfect time to show your loved ones just how much you care about their health and comfort. These gifts aren't just thoughtful—they're impactful and lasting, offering clean air every day, year after year, instead of a gift that might end up donated, discarded, or consumed.

Whether you're shopping for a family member, friend, or colleague, the gift of fresh, clean air is a choice you can feel good about. Use this guide to find the perfect Austin Air purifier for everyone on your list this holiday season.

THE IDEAL GIFT FOR PET LOVERS

For the pet enthusiasts in your life who seem to have it all – from adorable pet-themed decor to a collection of toys – a fresh idea may be closer than you think. As much as we love our furry friends, they bring extra airborne particles and scents into the home. These can trigger allergies, create odors, and sometimes even leave sensitive pet parents feeling conflicted between their pets and a clean home.

The Austin Air HealthMate Plus is here to make life with pets more enjoyable and worry-free. This powerful purifier removes up to 99.97% of allergens plus stubborn odors, making it a perfect gift for pet owners. Equipped with medical-grade HEPA and over 780 cubic inches of activated carbon and zeolite infused with potassium iodide, the HealthMate Plus goes beyond surface-level freshness, targeting the toughest pet odors to keep the home's air clean, safe, and refreshing.

It's the gift of fresh air and peace of mind—without the trade-offs.

THE PERFECT GIFT FOR CHEFS

Chefs – whether professional or passionate home cooks – can be a tough group to shop for. Chances are, they already have every tool and gadget in the kitchen. But when it comes to creating a safe cooking environment, there's one essential they might not have considered: clean air.

Cooking, especially with gas stoves, can release pollutants like carbon monoxide, carbon dioxide, nitrogen dioxide, and formaldehyde into the air. These byproducts of combustion can pose health risks, and air quality experts have cautioned against their effects for years.

Enter the Austin Air HealthMate Plus: the ultimate air purifier for kitchen safety. Equipped with up to 15 pounds of activated carbon and zeolite, it's designed to capture and neutralize these toxins, including contaminants like formaldehyde. Its medical-grade HEPA filtration removes 99% of airborne particles down to 0.1 microns, ensuring the kitchen stays as clean as it is creative.

For the chef in your life, the HealthMate Plus is more than a thoughtful gift—it's an investment in a healthier, safer cooking space.

THE ULTIMATE GIFT FOR THE HEALTH-CONSCIOUS HOMEOWNER

When it comes to gifting a health-conscious homeowner, few things are as thoughtful as a gift that supports their well-being. For those who prioritize a clean, healthy home environment, the Austin Air Bedroom Machine is a standout choice.

As the only clinically-proven air purifiers available, Austin Air units have consistently outperformed over 100 other models in government tests, making them the preferred choice for addressing a wide range of health and air quality concerns.

The Bedroom Machine is Austin Air's top-tier purifier, equipped with all the same HEPA and carbon in the HealthMate plus military-grade HEGA (High Efficiency Gas Absorption) carbon cloth, originally developed to protect against chemical, biological, and radioactive agents. This powerful, five-stage filtration system captures the broadest range of pollutants, from dust and pet dander to mold and household odors, ensuring the cleanest air possible.

For a homeowner dedicated to health, the Bedroom Machine offers unmatched air quality for a gift that goes above and beyond.

THE BEST GIFT FOR EXPECTING AND NEW PARENTS

Welcoming a new baby is a joyful and transformative time, yet it also brings new concerns, especially around health and safety. For parents, creating a clean, healthy environment for their little one becomes a top priority, even before birth.

The Austin Air HealthMate Plus offers parents peace of mind by removing allergens, pollutants, and harmful particles from the air, creating a safer space for both mom and baby. For smaller spaces, the HealthMate Plus Junior is an excellent choice, fitting perfectly into a cozy nursery.

Babies and young children are particularly sensitive to indoor air pollution – including in utero. Their faster breathing rate and developing respiratory systems mean they can inhale more pollutants, which may impact neurodevelopment and increase risks of asthma and even certain childhood cancers.

With an Austin Air purifier, parents can rest easier, knowing they've provided a healthier start for their little one. It's a gift that goes beyond the ordinary, supporting the whole family's well-being.

THE PERFECT GIFT FOR ALLERGY SUFFERERS

Chances are, you know someone affected by airborne allergies. For millions of Americans, allergies add daily challenges, and for those with respiratory issues like asthma or COPD, allergies can intensify symptoms and increase the risk of an allergy attack. Allergy medications may offer temporary relief, but they often come with side effects like drowsiness, dizziness, and nausea.

For loved ones struggling with allergies, the Austin Air HealthMate is a thoughtful and effective gift. The HealthMate's medical-grade HEPA filter captures 99% OF even the smallest allergens, helping reduce symptoms like sneezing, coughing, congestion, and itchy eyes.

For allergy relief on the go, the Austin Air "it" personal air purifier is a compact, travel-friendly solution perfect for workspaces or personal areas. Equipped with the same high-quality filtration Austin Air has provided for over 30 years, the "it" captures 99.97% of airborne particles 0.3 microns—including dust, pollen, pet dander, bacteria, and viruses. It's also available with an optional VOC Wrap to remove chemicals, gases, and volatile organic compounds (VOCs), making it an ideal companion for allergy sufferers wherever they go.

This holiday season, gift the peace and comfort of cleaner air.

A FANTASTIC GIFT FOR THE URBAN DWELLER

City living often means higher exposure to pollutants, making clean air a rare luxury. For loved ones in urban areas, reducing pollution exposure can have a significant impact on their well-being. Traffic emissions and industrial pollutants are linked to serious health concerns, including heart disease, strokes, and cognitive issues like dementia and Alzheimer's. These pollutants can also aggravate existing conditions like asthma, COPD, and allergies.

The Austin Air HealthMate Plus is a top choice for combating urban air pollution. Its combination of medical-grade HEPA, over 780 cubic inches of activated carbon, potassium-iodide-infused carbon, and zeolite effectively captures fumes from vehicles and industry, removing a wide range of chemicals, gases, and odors often found in city air. This purifier helps create a healthier indoor space, offering urban dwellers cleaner, safer air.

For those in smaller city apartments, the Austin Air HealthMate Plus Junior provides the same powerful filtration in a more compact design. With broad-spectrum adsorption, it's ideal for city dwellers exposed to pollutants like traffic fumes and wildfire smoke, making it a thoughtful gift for the health-conscious city resident in your life.

A SPECIAL GIFT FOR RURAL RESIDENTS

Living in the countryside includes many benefits like less traffic and noise. Many people would also assume that there is less pollution. While there is likely less litter, you can't count on less air pollution.

Rural regions face unique issues related to farming practices, including the use of fertilizers and pesticides. Crop burning, a common agricultural practice, releases harmful pollutants such as particulate matter and carbon monoxide.

Mining practices in rural regions also harm air quality. Drilling, blasting, and hauling generate substantial amounts of dust and particulate matter. Mining activities also release heavy metals such as lead, mercury, and arsenic into the air, plus hazardous airborne chemical pollutants such as sulfur dioxide (So₂), nitrogen oxides (NO_x), and volatile organic compounds (VOCs).

The Austin Air HealthMate Plus is an excellent choice for anyone concerned about gasses and poisonous pesticides. The Austin Air HealthMate Plus can remove a wide range of chemicals and gasses from the air with zeolite added to the activated carbon for a boost of adsorption. It's also excellent at eliminating airborne contaminants from a wildfire or crop-burning activity.

THE GREATEST GIFT FOR TEACHERS

Teachers dedicate themselves daily to educating and inspiring young minds, but they often face exposure to viruses and other airborne pollutants in bustling school environments. In the post-pandemic world, keeping a classroom clean and safe can be a real challenge. Hundreds of thousands of teachers and students around the country benefit from the clean air in classrooms provided by the Austin Air HealthMate.

However, teachers may also benefit from the Austin Air Bedroom Machine, especially during cold and flu season. The Austin Air Bedroom Machine, is equipped with an additional fifth stage of filtration featuring a HEGA carbon cloth that has the ability to capture and neutralize viruses and bacteria, making it the perfect purifier for creating a healthier classroom environment.

But no matter which model you choose for the teacher in your life, you'll be giving a gift with a positive impact that goes beyond what most gifts can do. Studies have shown that using air purifiers in classrooms can improve both student attendance and test scores, making the Austin Air Bedroom Machine a gift that supports a teacher's career while positively impacting their students. It's a meaningful and generous way to show appreciation for the teacher in your life, helping them focus on what they do best – educating our youth.

This holiday season, give the gift of cleaner air with the Austin Air Bedroom Machine, a choice that demonstrates care for both the well-being and success of a teacher you love. And don't let the name fool you, the Bedroom is an excellent source of protection in any room.

THE PERFECT GIFT FOR THE WORK-FROM-HOME EMPLOYEE

For many, a significant portion of the day is spent working, and for those who work from home, their home office becomes a central hub of productivity. A high-quality air purifier makes an excellent gift for your work-from-home friend or loved one, helping them cultivate a healthier and more comfortable workspace.

The Austin Air HealthMate effectively removes pollutants like dust, allergens, and volatile organic compounds (VOCs), contributing to better focus and overall well-being. With proven HEPA technology that captures up to 99% of airborne contaminants as small as 0.1 microns, this purifier ensures a cleaner air environment. Additionally, the activated carbon effectively eliminates unwanted chemicals, gases, and odors.

If your loved one has a smaller workspace, consider the Austin Air HealthMate Junior or the compact “it” personal air purifier. Both options fit seamlessly into limited spaces while still delivering top-notch air filtration.

These purifiers are not only perfect for home offices but also make a valuable addition to any workspace, ensuring clean air wherever work is done.

A GREAT GIFT FOR THE ECO-CONSCIOUS PERSON

For the eco-conscious person in your life, a gift that aligns with their commitment to the environment can be incredibly meaningful. Austin Air purifiers are thoughtfully designed with sustainability in mind. From the HealthMate to the compact “it” personal purifier, each unit is built to be energy-efficient, operating with low power consumption to keep energy use to a minimum.

With a durable, long-lasting filter designed to last five years, Austin Air purifiers offer a sustainable solution to cleaner indoor air. This extended filter life means less waste and fewer replacements, which helps reduce overall carbon footprint—perfect for those striving to live more sustainably. And because all units are manufactured in the USA, Austin Air reduces the environmental impact associated with long-distance shipping, supporting eco-friendly practices from production to your home.

For eco-conscious individuals, Austin Air offers a practical and thoughtful gift: clean air with a lighter environmental impact. It's a choice they can feel good about every day.

THE BEST GIFT FOR PEOPLE WITH SLEEP ISSUES

Quality sleep is essential for feeling and functioning at your best, yet pollutants in the bedroom can make restful nights hard to come by. For those who struggle with sleep, an Austin Air purifier—especially the Bedroom Machine—is an ideal gift to create a cleaner, more relaxing environment. The bedroom can actually be one of the most pollutant-heavy spaces in the home since we lose around 50% of our lung capacity to filter air while lying down.

Airborne allergens and pollutants often disrupt sleep and can worsen respiratory issues, leading to nighttime coughing, sneezing, snoring, and even a weakened immune system. With an Austin Air purifier, these problems can be significantly reduced, allowing for deeper, uninterrupted rest.

Austin Air Purifiers also emit a gentle, low-decibel white noise, ideal for sleep, that helps filter out disruptive sounds.

Choose the Standard model for larger rooms, the HealthMate Junior for cozier spaces, or the compact “it” model for travel and personal use—ensuring your loved one breathes clean air wherever they rest. This season, give the gift of rejuvenating sleep with an Austin Air purifier, because everyone deserves to wake up refreshed and ready for the day.

A MOST CONSIDERATE GIFT FOR YOUR IMMUNOCOMPROMISED LOVED ONES

When a loved one is immunocompromised, even familiar environments can feel risky. Airborne pollutants – whether from traffic, indoor allergens, or household chemicals – can pose significant threats to their health. The Austin Air Bedroom Machine is an ideal gift for creating a safer, cleaner space for immunocompromised individuals, thanks to its advanced, five-stage filtration system.

Equipped with medical-grade HEPA and military-grade HEGA carbon cloth, the Bedroom Machine targets a wide range of pollutants, including viruses, bacteria, allergens, and other harmful particles that may aggravate sensitive immune systems. This purifier offers peace of mind and supports their health by creating an environment that's significantly cleaner and safer to breathe in.

Give the gift of protection and care with the Austin Air Bedroom Machine – a thoughtful choice for those who deserve a worry-free, healthier space this holiday season.

AN IDEAL GIFT FOR PEOPLE WITH COPD

Living with Chronic Obstructive Pulmonary Disease (COPD) can be challenging, with symptoms like difficulty breathing, persistent coughing, and wheezing impacting daily life. While there is no cure for COPD, certain measures can significantly improve quality of life, and one of the most effective is investing in a high-quality air purification system.

The Austin Air HealthMate is clinically proven to alleviate COPD symptoms and enhance air quality. In clinical trials conducted by Johns Hopkins University, the HealthMate demonstrated a remarkable ability to reduce pollutants in the homes of individuals with COPD. After six months of use, participants reported significant improvements in medication usage, overall symptoms, and the risk of flare-ups.

This holiday season, give the gift of relief and better health with the Austin Air HealthMate, a thoughtful choice that can help your loved ones breathe easier and live more comfortably.

THE BEST GIFT FOR PEOPLE WITH ASTHMA

Caring for a loved one with asthma can be challenging, especially with environmental factors like dust, allergens, pet dander, and chemicals that can trigger potentially life-threatening attacks. Maintaining a clean, allergen-free environment is essential for managing asthma symptoms, reducing reliance on medication, and preventing dangerous episodes.

Since 2001, Austin Air has participated in clinical trials to assess the impact of air purifiers on health, starting with asthma. We were selected by the American Academy of Pediatrics and the nation's top children's hospital, Cincinnati Children's Hospital, to test how an Austin Air purifier could alleviate asthma symptoms and reduce emergency room visits in children. In this study, purifiers were placed in the bedroom at night and the main family room during the day. Over twelve months, children experienced notable improvements in asthma symptoms, and ER visits dropped significantly.

The Austin Air HealthMate is the ultimate holiday gift for those managing asthma. This advanced air purifier is designed specifically to tackle the pollutants that can worsen asthma symptoms. Equipped with a true medical-grade HEPA filter to capture even the tiniest airborne particles, along with an extensive activated carbon layer to remove odors and harmful chemicals, the HealthMate provides unparalleled relief.

Give the gift of clean, breathable air this holiday season with the Austin Air HealthMate—a thoughtful choice that supports your loved one's health and well-being, helping them breathe easier and live with greater comfort and confidence.

A GREAT GIFT FOR SENIORS

Protecting the health of grandparents and older adults is a top priority, especially as flu hospitalizations among the elderly continue to rise. With their increased vulnerability to respiratory issues and allergies, providing cleaner air is one of the best ways to support their well-being.

The Austin Air Bedroom Machine is an exceptional gift choice for seniors, specifically designed to meet their unique health needs. This advanced air purifier features a comprehensive five-stage filtration system that effectively removes airborne pollutants, allergens, and harmful particles, creating a healthier living environment. Its combination of medical-grade HEPA and activated carbon plus HEGA carbon cloth ensures that the air they breathe is as clean as possible, helping to reduce the risk of respiratory issues and improving overall comfort.

This holiday season, show your love and care with the Austin Air Bedroom Machine—a meaningful gift that contributes to the health and happiness of the seniors in your life, giving them the gift of clean, fresh air.

A FANTASTIC GIFT FOR ANYONE LIVING IN WILDFIRE ZONES

For individuals impacted by wildfire smoke, finding effective air filtration is crucial. Wildfire smoke contains a mixture of fine particulate matter and harmful chemicals that can deeply penetrate the lungs, causing irritation, respiratory issues, and even long-term health effects. The Austin Air HealthMate Plus is specifically designed to address these challenges, providing powerful, specialized filtration that makes a true difference in air quality for those facing smoke exposure.

The HealthMate Plus stands out for its unique potassium-iodide impregnated activated carbon, which offers exceptional adsorption capabilities against harmful gases and smoke. Unlike standard activated carbon filters, the potassium-iodide enhancement enables the HealthMate Plus to capture and neutralize a broader range of toxic compounds found in wildfire smoke, such as formaldehyde, ammonia, and other volatile organic compounds (VOCs). This specialized carbon layer absorbs the smoky odors and hazardous chemicals, making the air safer and more breathable even in areas heavily affected by wildfire smoke.

Additionally, the HealthMate Plus includes a true medical-grade HEPA filter that captures fine particulate matter (PM2.5) common in wildfire smoke. This filter is capable of removing 99.97% of particles as small as 0.3 microns, effectively trapping the fine ash, soot, and allergens that are often present in smoky air. Together, the HEPA filter and the potassium-iodide activated carbon form a powerful defense against wildfire pollutants, protecting the respiratory system and improving indoor air quality.

For anyone in wildfire-prone regions, the Austin Air HealthMate Plus is an invaluable investment in health and comfort. Its advanced, multi-layered filtration system provides peace of mind and cleaner air during fire season and beyond, offering relief to those who need it most.

WHICH UNIT TO BUY? A NOTE ON SIZE

Now that you're considering an Austin Air purifier, you may be wondering which size is right for your needs. Specifically, how much space can each unit effectively clean? While it's challenging to pinpoint exact square footage due to variations in individual spaces, several factors come into play, including ceiling height, room shape, the number and location of windows and doors, and the level of incoming contaminants.

We generally recommend that our Standard Size unit is most effective for larger interior spaces, while the Junior Unit is well-suited for smaller areas such as bedrooms or home offices. The "it" Unit is designed for personal spaces. However, it's important to note that the Junior and "it" Units are not recommended for standard room sizes.

The Standard Size unit offers the advantage of operating on lower speeds while still providing superior air filtration. This means you have the option to increase its power when needed, giving you greater flexibility. Additionally, the Standard unit comes equipped with casters, making it easy to move from one room to another.

While air purifiers work best when concentrated in an open space, the clean air will naturally circulate into adjoining areas. If you have any further questions regarding coverage or specific needs, please don't hesitate to contact our customer service team at 1-800-724-8403 – we're here to help!

STANDARD UNITS

- **HealthMate** - our flagship unit
- **HealthMate Plus** - with carbon-impregnated potassium iodide, the HealthMate Plus is particularly effective at adsorbing gases
- **Bedroom Machine** - don't let the name fool you, it's a great addition to any room thanks to its HEGA carbon cloth that can capture and neutralize bacteria and viruses [5 stages of filtration]

JUNIOR UNITS

- **HealthMate Junior**
- **HealthMate Junior Plus**

PERSONAL AIR PURIFIER

- The Austin Air "it"

FLEXIBLE PAYMENT OPTIONS

Prefer not to pay in full right away? With Klarna and PayPal, you can break down the cost of your air purifier into manageable installments. Klarna offers a simple way to pay over time, while PayPal provides flexible financing options for a more budget-friendly approach to your purchase.

Eligible customers can choose from four interest-free payments or opt for monthly payments over 6, 12, 18, or 24 months, with terms set by Klarna or PayPal.

To explore these options, just fill your cart on [AustinAir.com](https://www.austinair.com), enter your shipping details, and select Klarna or PayPal at checkout. (Tip: comparing both options can help you find the one that best fits your budget!)

Klarna.

The Impact of Austin

Austin Air remains the original maker of high-end filtration systems. Sold in more than 100 countries, we maintain the largest air cleaner manufacturing facility in the world, at 480,000 square feet. The company is proud to assemble everything in-house in Buffalo, New York.
